Dmitry Mikhailov

Frontend Developer | React, TypeScript, Next.js

Kemerovo, Russia - remote | github.com/fsaidad | @core_broken

Self-employed contractor; available for remote roles and fixed-scope paid projects.

PROFILE

About three years of commercial frontend development: React/Next.js interfaces, API integration, client state and responsive layouts. I implement agreed user flows and verify error states and performance. Client work is under NDA; public projects demonstrate code, engineering decisions and documented limitations.

SKILLS

Frontend: React, TypeScript, Next.js, JavaScript, Redux Toolkit, Zustand, REST API, HTML/CSS/SCSS.

Quality and tools: Jest/Vitest, React DevTools, Chrome DevTools, Lighthouse, Git, Vite/Webpack.

Content and localization: Hugo, Markdown, i18n, technical SEO. **Portfolio:** NestJS, Docker, Three.js/WebGL, PostgreSQL.

COMMERCIAL EXPERIENCE

Frontend Engineer | Commercial projects under NDA | Jan-Jul 2026

- Built a JavaScript pipeline to normalize Markdown and reconcile content with REST APIs for two multilingual projects: about 5,000 pages in 10+ locales.
- Automated validation of over one million internal links per run. Worked with Hugo, hreflang, sitemaps, redirects and localized URLs.
- Key tested templates reached Lighthouse scores of 95-100 in mobile mode.

Frontend Engineer | Independent client projects (NDA) | Aug 2023-Apr 2026

Project-based work for independent clients.

- Built React/Next.js interfaces from Figma: typed components, client state, REST integrations and Jest/Vitest tests.
- Reduced unnecessary re-renders by about 85% in the measured scenario of a UI with 1,000+ items, using React DevTools profiling and other debugging tools.
- Coordinated frontend integrations in a five-developer team that delivered a working prototype in one month.

SELECTED PORTFOLIO PROJECTS

Voxel Drop 3D - own React/TypeScript/Three.js browser puzzle: interactive 3D scene, camera-relative controls, tested game logic, persistent local progress and RU/EN UI. Live demo | Code

Async URL Checker - NestJS + React/RTK Query technical assignment: batch HTTP checks, bounded concurrency, cancellation, tests and Docker. In-memory storage and deployment limits are documented. Code and README

EDUCATION AND LANGUAGES

Tomsk State University of Control Systems and Radioelectronics - incomplete undergraduate studies, 2025.
Russian - native. English - basic (A2); written communication preferred.
