Dmitry Mikhailov

Frontend Developer | React, TypeScript, Next.js

Kemerovo, Russia - remote | github.com/fsaidad

Self-employed contractor; available for remote roles and fixed-scope paid projects.

PROFILE

About three years of commercial frontend development: React/Next.js interfaces, API integrations, client state, responsive layouts and performance. I take an agreed user flow from requirements to implementation and verification. My separate portfolio projects demonstrate additional backend and interactive WebGL skills.

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, Redux Toolkit, Zustand, REST API, HTML/CSS/SCSS, Vite/Webpack.

Quality and content delivery: Jest/Vitest, Git, Lighthouse, Chrome DevTools, Hugo, i18n, technical SEO.

Additional portfolio stack: NestJS, React/RTK Query, Docker, Three.js/WebGL, PostgreSQL.

COMMERCIAL EXPERIENCE

Frontend Engineer | Commercial projects under NDA | Jan-Jul 2026

Frontend and content delivery for two multilingual projects: about 5,000 pages in 10+ locales. Built a JavaScript pipeline to normalize Markdown and reconcile content with REST APIs; automated validation of over one million internal links. Worked with hreflang, sitemaps, redirects and localized URLs. Key tested templates reached Lighthouse scores of 95-100.

Frontend Engineer | Independent client projects | Aug 2023-Apr 2026

Built React/Next.js interfaces from Figma, typed reusable components, API integrations and Jest/Vitest tests. Reduced unnecessary re-renders by about 85% in a UI with 1,000+ items, based on profiling. Coordinated frontend integrations in a five-developer team that delivered a prototype in one month; also handled PHP/WordPress integrations.

SELECTED PORTFOLIO PROJECTS

Voxel Drop 3D - own React/TypeScript/Three.js browser puzzle: interactive 3D scene, camera-relative controls, deterministic game logic, local progress and tests. Live demo | Code

Async URL Checker - NestJS + React/RTK Query technical assignment: batch HTTP checks, bounded concurrency, cancellation, tests and Docker. In-memory storage and deployment limits are documented. Code and README

These are independent portfolio projects and a technical assignment, not client production case studies.

EDUCATION AND LANGUAGES

Tomsk State University of Control Systems and Radioelectronics - incomplete undergraduate studies, 2025.
Russian - native. English - basic (A2); written communication preferred.
