Dmitry Mikhailov

Frontend Heavy Full Stack Engineer

Russia - Remote | github.com/fsaidad

PROFILE

Frontend-heavy full-stack engineer with about 3 years of commercial web development. Builds production React and Next.js interfaces, Node.js integrations, real-time flows, automated content pipelines, and reliable tests. Strong focus on performance, diagnostics, maintainability, and shipping measurable outcomes in distributed teams.

CORE SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, Redux Toolkit, Zustand, TanStack Query, HTML, CSS, SCSS
Backend and data: Node.js, NestJS, PostgreSQL, REST, GraphQL, WebSocket, SSE
Quality and delivery: Jest, Vitest, Playwright, Docker, CI/CD, Sentry, Lighthouse, Git, PHP/WordPress integrations

EXPERIENCE

Frontend Engineer | Project-based commercial work under NDA | Apr-Jul 2026

- Delivered two multilingual commercial web projects covering about 5,000 pages and 10+ locales using Hugo, JavaScript, Markdown, REST APIs, and automated build checks.
- Built a JavaScript pipeline that normalized malformed Markdown, reconciled content with REST data, and validated more than 1 million internal links.
- Implemented localized URLs, hreflang, sitemaps, redirects, and template optimization; achieved Lighthouse scores of 95-100 on key pages.

Frontend Engineer | Independent commercial projects | Aug 2023-Apr 2026

- Built React and Next.js applications with typed components, REST integrations, authentication, state management, and adaptive cross-browser interfaces from Figma.
- Optimized an interface with 1,000+ items and reduced unnecessary re-renders by about 85%; added Jest and Vitest coverage and production build tooling.
- Coordinated integrations in a five-person team and helped ship a working prototype within one month, including PHP and WordPress integration work.

SELECTED PROJECTS

Async URL Checker - NestJS and React/Redux application for background batch URL processing with cancellation, progress reporting, tests, and Docker.
Flow Builder - visual workflow editor with typed state, interactive nodes, connections, and production-style UI states.
Collaborative Task Board - responsive task-management interface focused on clear hierarchy and complex interaction states.
Voxel Drop 3D - interactive Three.js/WebGL experience demonstrating real-time rendering and polished visual feedback.

EDUCATION AND LANGUAGES

Tomsk State University of Control Systems and Radioelectronics - undergraduate studies, incomplete, 2025
Russian - native | English - basic (A2)
